**What Is Transgender?**

**Transgender** (trans) is “an umbrella term for people whose gender differs from the sex they were assigned at birth. The term transgender is not indicative of gender expression, sexual orientation, hormonal makeup, physical anatomy, or how one is perceived in daily life” (TSER, 2017). A **trans woman** is a person who was assigned male at birth but who identifies as a woman. A **trans man** is a person who was assigned female at birth but who identifies as a man. Some people do not identify strictly as a woman or a man. These individuals may identify as **non-binary** or **agender**.

Transgender is an adjective, not a noun. In other words, you would not say that someone is “a transgender” (this is derogatory). Instead, you could say that someone is a transgender person. Also note that the word transgender does not have an “-ed” at the end (i.e. you would not say that someone is a “transgendered” person).
